PROFESSIONAL EXPERIENCE

Financial Institutions Analyst

July 2025 – September 2026

Al Baraka Bank Syria, Treasury & Investment Department | Damascus Countryside, Syria

- Co-developed, with the Risk Management Department, the Bank's standardized **counterparty Credit Rating Model**, which converts any bank's published financial statements into eight ratios across profitability, liquidity, capital adequacy, operational efficiency, and asset quality, grades each on a five-band scale, and produces a weighted score conservatively adjusted for the weakest factor.
- Mapped the score to a 20-grade rating scale with S&P-equivalent grades and an associated **probability of default (PD)**, capped by the counterparty's external or sovereign rating; Risk Management uses the PD as an input to expected credit loss.
- Aligned model weightings with the Bank's **Risk Appetite Framework**, enhancing the consistency of risk reporting and strengthening Senior Management's credit limit and counterparty decision-making.
- Conducted **financial, risk, and due diligence assessments** of prospective local and international banks for correspondent banking relationships, presenting findings and recommendations to Senior Management; carried a major share of the workload behind the Bank's roughly **80% correspondent network expansion** after the lifting of international sanctions on Syria.
- Managed the **credit limit renewal process** for correspondent financial institutions by tracking maturity dates, conducting periodic assessments, and ensuring renewal studies were submitted before expiration; produced close to half of the counterparty ratings during the bulk renewal.
- Conducted periodic **financial analysis and benchmarking** of Syrian and international banks, evaluating financial performance, profitability, liquidity, capital adequacy, asset quality, and operational efficiency.
- Monitored and evaluated **correspondent banking exposures** across Vostro and Nostro accounts and the **utilization of credit limits** granted to correspondent banks, coordinating with relevant departments to assess exposure levels and ensure compliance with approved limits.
- Developed and maintained **Correspondent Banking Channel Utilization Dashboards** end to end: extracted transfer data from the iMAL system using transfer-related queries; cleaned, validated, and structured it for reporting; transformed European Central Bank (ECB) exchange-rate XML data in Power Query (M code), handling non-business days; and consolidated multi-currency transactions into the reporting currency to give visibility into channel utilization.
- Reviewed and maintained **KYC documentation** for correspondent banks and financial institutions during relationship renewals (Wolfsberg CBDDQ, W-8BEN/W-8BEN-E, W-9, FATCA, CRS, UBO), in support of the Bank's compliance review.
- Developed **investment evaluation models** integrating fundamental, valuation (market capitalization, P/E, P/B), risk-adjusted performance (Sharpe ratio, volatility, historical returns), and technical (RSI, price trends, moving averages) analysis to assess equities and other financial instruments and support investment selection for the Bank's portfolio.
- Researched and analyzed **economic developments, market trends, and geopolitical events** across international markets, producing periodic reports on their potential impact on the Bank's investment strategy, financial exposures, and risk profile.

Budget & Financial Control Analyst July 2024 – July 2025

Bank Al Sharq S.A.S., Finance Department | Damascus, Syria

- Participated in preparing the Bank's **annual budget** in accordance with Senior Management guidelines, accounting standards, and departmental forecasts and estimations.
- Tracked monthly budget execution and performed **budget-versus-actual analysis**, issuing performance reports to departments comparing actual results against budget targets.
- Presented **performance commentary** to department heads, analyzing budget deviations and identifying key drivers affecting financial performance.
- Established the concept and framework of the Bank's **financial e-newsletter for Senior Management**, providing concise insights into financial performance, budget variances, key financial metrics, and other significant developments to support timely management decision-making.
- Prepared financial reports for Senior Management and the Board of Directors, including **monthly management reporting packages and Board presentations**.
- Prepared **16 ALCO (Asset and Liability Committee) reporting packages** and followed up on related action items and financial developments.
- Prepared the financial and analytical sections of the Bank's **Annual Report**, covering macroeconomic indicators, the Bank's financial performance, and banking sector analysis.
- Reviewed and analyzed the Bank's overall **profitability and financial performance** to support management decision-making.
- Conducted quarterly **peer benchmarking** and comparative analysis, evaluating the Bank's financial performance against comparable banking institutions.
- Provided financial analysis, consulting, and decision-support assistance to various departments across the Bank.

Bank Teller November 2023 – May 2024

Banque Bemo Saudi Fransi, Branches | Damascus, Syria

- Recorded and processed financial transactions in the ICS banking system in compliance with applicable policies and procedures, handling cash deposits, withdrawals, and other counter transactions and addressing customer inquiries.

FINANCIAL ANALYSIS PORTFOLIO

Syrian Banking Sector Peer Analysis Q4 2024 – Present

Ongoing financial benchmarking and peer analysis of the Syrian banking sector, evaluating profitability, liquidity, capital adequacy, asset quality, operational efficiency, and market performance across listed banking institutions.

Correspondent Banking Channel Transaction Demand & Volume Forecasting Model July 2026

Forecasted correspondent banking transaction demand and monthly transfer volumes using branch-level demand estimates, confidence-weighted assumptions, and a 12-month customer adoption curve, with projected impacts on Nostro balances, fee income, liquidity carry, and net contribution.

Treasury Revenues: Budget vs. Actual & Variance Analysis May 2026

Evaluated treasury revenue performance against budget targets, identifying key variances, performance drivers, and trends through financial modeling and data visualization (fictionalized data used due to banking confidentiality).

Investment Portfolio Management and Its Impact on Profitability (MBA Research) September 2026

Empirical financial study examining the relationship between investment portfolio management and profitability in Islamic banking using panel data analysis. Developed as part of the MBA requirements in Financial Management at HIBA.

Feasibility Study & Valuation Model (Academic) October 2025

Excel feasibility and valuation model applying discounted cash flow (DCF), net present value (NPV), and internal rate of return (IRR) analysis to appraise investment viability. Completed for the Valuation & Feasibility Study course at HIBA.

Financial Instruments RSI Tracker Dashboard (Academic) August 2025

Interactive dashboard for monitoring financial instruments using the Relative Strength Index (RSI) and technical analysis indicators to support investment analysis and market trend evaluation. Developed for the Investment Analysis course at HIBA.

Internal Factors Affecting the Marketability of Private Banking Services (Bachelor's Research) July 2023

Quantitative research study analyzing internal organizational and service-related factors influencing the marketability of private banking services; Bachelor's degree requirement at the Arab International University.
